

Rooms Height Measurements

Room 210

23' 0"	Under airwall ceiling between X1 and 220a
26' 7"	Height under all airwalls rails
28' 4"	Under security cameras (not shown on room drawing)
28' 9"	Under structural east-west lowbeams room 210dh (area with no rigging points)
30' 1"	Under hanging points and north-south beams
35' 4"	Height of top ceiling

\* All other structural elements as neons, airdocks etc... are higher than height of beams as for they are not in the way of any rigging (higher than 30'1» )

Room 220

14' 4"	Lower ceiling south of room
15' 4"	Lower ceiling north of room
21' 10"	Under curtain walls
25' 7"	Under cable tray north and east of room 220e (not on drawing)
26' 3"	Under airdock passing below main east-west beam, west of 220a pillar
27' 7"	Under neon fixtures
27' 9"	Under main east-west beam (sustained by concrete pillars)
31' 4"	Heigh of plate type of hanging points (represented by a circle on drawings)
31' 8"	Under ceiling concrete north-south beams
32' 2"	Under airdock passing east of 220a room (not on drawing)
35' 4"	Top ceiling height and ceiling anchored hanging points (represented by squares on drawing)

Room 230 and X1 to X4

24' 1"	Under «T» shaped pillars
26' 7"	Height under all airwalls rails
28' 4"	Under security cameras (not shown on room drawing)
30' 1"	Under hanging points and north-south beams
35' 4"	Height of top ceiling

Room 517

<b>Ceiling:</b>	<b>West Mezzanine:</b>
24' 5" Under aluminium baffles	7' 6" Under 516 sliding doors
24' 5" Under neon fixtures	7' 10" Under mezzanine fringe
26' 8" Under east-west lowbeams	8' 9" Under mezzanine
26' 2" Under north-south lowbeams	
27' 2" Height of suspended rigging steel points	<b>North lower ceiling</b>
Height of points when made from higherbeams	7' 11" Under fringe
41' 5" Top of second ceiling	8' 1" General clearance
<b>Air walls:</b>	<b>East Mezzanine:</b>
23' 5" 517ab	7' 10" Under fringe
23' 4" 517bc	8' 9" General clearance
23' 5" 517cd	
<b>South lower ceiling:</b>	<b>Other heights:</b>
25' 11" Under solid ceiling	9' 6" Height between mezzanine floor and main floor
23' 10" Under fringe of solid ceiling	13' 1" Height of top of mezzanine handrail and main floor
23' 10" Height under all airwalls rails	3' 5" Height of top of mezzanine handrail and mezzanine floor
	13' 1" Height of lower part of s.i. room windows with main floor
	15' 7" Height of top part of s.i. room windows with main floor
	20' 0" Height between north mezzanine floor and main floor
	23' 3" Height between north mezzanine handrail and main floor
	8' 9" Height of clearance on north-east mezzanine in room 517d

Room 710

<b>Ceiling:</b>	<b>Others:</b>
21' 5 ½" Under airwall	18' 6 ¼" Height of west windows
22' 3" Under neon fixtures	13' 1" Height of solid side walls (inhouse equipment storage room)
22' 9" Under big north-south beams	2' 6" Distance between top of windows and small beams
23' 0" Under small east-west beams	East-west beams size 4 1/16» width x 4» high
	North-south beams size 10 1/8» width x 10 3/8» high
